Sonipat, Haryana, India | [linkedin.com/in/ankita-taneja-390613396/](https://www.linkedin.com/in/ankita-taneja-390613396/) | github.com/Ankitatan

SUMMARY

Business and Data Analyst with a B.Tech in Information Technology, M.Tech in Computer Science Engineering, and hands-on experience in data analysis, business reporting, SQL, Python, Excel, dashboard development, and machine-learning-driven insights. Experienced in analyzing operational and customer data, identifying trends and performance drivers, automating analytical workflows, and translating complex datasets into actionable business insights. Strong foundation in KPI analysis, data cleaning, exploratory analysis, reporting, visualization, forecasting, and stakeholder-focused decision support. Interested in applying analytics and automation to Customer Success, Operations, Revenue, and SaaS business problems.

EDUCATION

IIIT Bangalore

Master of Science

Currently Pursuing

M.Tech — Computer Science & Engineering

2013 – 2015 | Completed 2018

B.Tech — Information Technology

2008 – 2012 | Completed 2013

EXPERIENCE

Data Analyst Intern

January 2025 – January 2026

NextHikes

- Analyzed business datasets using Python, Pandas, NumPy, SQL and Excel-oriented analytical workflows to identify trends, anomalies, performance drivers and opportunities for improvement.
- Performed data cleaning, transformation, exploratory analysis and statistical analysis on structured business datasets.
- Developed analytical dashboards and interactive reports to communicate KPIs, trends and actionable findings.
- Built forecasting and predictive analytics solutions to support data-driven business decision-making.
- Used SQL and Python to extract, transform and analyze data from structured datasets and databases.
- Investigated relationships between business variables and translated analytical findings into practical recommendations.
- Automated repetitive analytical workflows using Python, reducing manual data-processing effort.
- Applied root-cause and trend analysis to understand performance changes and identify improvement opportunities.
- Communicated analytical findings through visualizations, dashboards and concise business-oriented insights.

Software Developer

2016 | 6 months

Aumtechmantra LLP

Gurgaon

- Developed and maintained software solutions while working with structured data and application workflows.
- Collaborated with team members to understand functional requirements and translate business needs into technical solutions.
- Troubleshoot application and data-related issues and supported process improvements.
- Worked with databases and programming concepts, strengthening technical understanding relevant to analytics and business systems.

Customer Relationship Manager

2017 | 6 months

Jagmohan Maruti Pvt. Ltd.

- Managed customer interactions and supported relationship-management processes in a customer-facing business environment.
- Maintained customer information and coordinated with internal teams to address customer requirements.
- Developed practical understanding of customer lifecycle, service operations and business performance.
- Used structured information and customer feedback to support operational decision-making.

Software Developer

2012 – 2013

Technovite Lab Pvt. Ltd.

Sonipat

- Developed software applications and worked with programming, databases and application logic.
- Translated functional requirements into technical implementations and supported application troubleshooting.
- Built foundational experience in SDLC, problem-solving, database concepts and software development.

PROJECTS

Customer Satisfaction & Flight Analytics | Python, SQL, Streamlit, MLflow

- Developed an end-to-end analytics application combining exploratory analysis, customer satisfaction prediction and business-oriented visualizations.
- Analyzed 130K+ flight-related records to identify patterns affecting customer satisfaction and pricing.
- Built interactive dashboards to communicate operational and customer insights.
- Developed predictive models achieving approximately 96.8% classification accuracy for customer satisfaction.

Rossmann Sales Forecasting | Python, Pandas, Scikit-learn, XGBoost, Streamlit

- Analyzed historical sales, store and promotional data to identify business drivers and seasonal patterns.
- Developed a sales forecasting model to estimate future performance and support planning decisions.
- Performed feature engineering, data preprocessing, model evaluation and visualization.
- Built a Streamlit interface for practical business use of the forecasting solution.

Vaccination Data Analysis | SQL, Python, Power BI

- Cleaned and analyzed vaccination datasets to identify trends and performance patterns.
- Used SQL and Python for data preparation and analysis.
- Created Power BI visualizations to present KPIs and trends in an accessible business format.

Personal Expenses Analytics | Python, SQL, Streamlit

- Built a data-driven application for tracking and analyzing expenses.
- Used SQL for structured data storage and Python for analysis and transformation.
- Developed interactive reporting to identify spending patterns and category-level trends.

E-commerce Sentiment Analysis | Python, Scikit-learn

- Analyzed customer reviews to identify sentiment patterns and customer feedback trends.
- Applied TF-IDF, classification techniques and data preprocessing to transform unstructured reviews into actionable insights.

TECHNICAL SKILLS

Business Analysis: KPI Analysis | Business Reporting | Root Cause Analysis | Trend Analysis | Process Improvement | Requirements Understanding | Data-Driven Decision Making | Performance Analysis | Operational Analytics

Data & Analytics: SQL | Python | Pandas | NumPy | Excel | Statistical Analysis | Data Cleaning | Exploratory Data Analysis | Forecasting | Segmentation

Business Intelligence: Power BI | Streamlit | Plotly | Matplotlib | Dashboard Development | MIS Reporting | Interactive Reporting | Data Visualization

Machine Learning: Scikit-learn | XGBoost | Predictive Modeling | Classification | Regression | Clustering | Model Evaluation

Databases & Tools: MySQL | SQLite | SQLAlchemy | Git | GitHub | Jupyter Notebook | MLflow

ADDITIONAL STRENGTHS

Strong analytical and problem-solving ability Comfortable working with large and messy datasets Strong attention to data quality and accuracy Ability to communicate technical analysis in business-friendly language Understanding of customer, operational and performance metrics Experience building self-service analytical applications and dashboards Technical background enabling effective collaboration with engineering and product teams AI-first approach to analytics automation and productivity

TARGET ROLE

Business Analyst | Customer Success Analytics | Business Intelligence | Operations Analytics | Revenue Analytics
